### **UNITRONIC® Li2YCY (TP)**

#### **Application**

UNITRONIC® Li2YCY (TP) are data cables with low capacitance for wiring of data systems at transmission rates up to 10 Mbit/s and is qualified for the serial interfaces RS422 und RS485. They can be used as a signal-, control- and measuring cable as well as for transmission of low, sensitive signals and high bit rates.

Decoupling by means of twisted pair cable design and the screen protects against electromagnetic interferences.

These cables are designed for fixed installation in dry and damp interiors and for occasional flexible use. They can be used for solderless connections, e.g. connections with insulation displacement technology and MAXI-TERMI-Point wiring.

#### Design

Design Design based on standard VDE 0812 and EN 50288-7
