EPIC® H-A 3 MAGD

The EPIC® H-A 3 series comprises the smallest housings in the heavy-duty industrial connector range and ensures secure connections in the smallest of spaces.

The panel mount housing is mateable to many commercially available grommet housings.

Protective cover protects against environmental influences when not plugged in.

Integrated, internal seal simplifies assembly (no small parts to lose).

The arrow as a new design element on the surface of the housing is easy to feel and simplifies plugging in spatially confined and possibly poorly visible application areas.

To protect the connector insert from environmental influences.

For use with many EPIC® rectangular connector inserts.

For power supply connection of devices and machines in various applications.
